Once upon a time I forgot default password for my lab VPN concentrator. Next day I forgot default password for a brand new ACS appliance. Seems to me stepping twice on the same rake is enough for not quite stupid young man. So I decided to collect default passwords for all devices I happen to laid a hand on.

Device	Login	Password	Description
IOS device manager	cisco	cisco	
IOS WiFi Access Point	Cisco	Cisco	
VPN3000 Concentrator	admin	admin	
IDS/IPS			

cisco

ciscoids

cisco

attack

old version(not sure)

ACS appliance v4.x	Administrator	setup	serial console access
ACS appliance v5.x	setup	-	serial console access
ACS appliance v5.x	ACSAdmin	default	Web access
Cisco Security Manager		-	set during installation
Content Engine	admin	-	0x8000 flag set during boot
NAC appliance			

admin

Default passwords for network devices
